Temp Desk

The Temp Desk is a central way for you to access the current temporary vacancies and placements for filling, processing and timesheets.

From 2.21.8+ scroll arrows have been added to the top panel header and for some of the views headers to make it easier to see all the fields and options on the temp desk when viewing on a smaller screen.

There are three different views to the Temp Desk. The Temp Desk opens in the default view for your user login, but you can access other Temp Desks and views.
