## Adding more personalisation to Boiler Plate Text

1/1

## (2.3.4+)

This feature allows SMS and Emails to be personalised using Boiler Plate Text. For example a Salutation can be added to Shift Details texted to a candidate. See below for an example. However, the number of characters is still limited to 160 so this must be considered when creating Boiler Plate Text.

To configure this feature - Maintenance - Agency Setup - Boiler Plate Text - New Boiler Plate Text can be added here. Users can access the Boiler Plate Text in the usual way.
