

# How to send CVs to a vacancy contact

CVs can be sent from a Vacancy Short List.

The Contact Event will be linked to the Vacancy, Company Contact and Candidate.

Candidates can be selected by checking the Select box on the right or selected by Progress State once in the Send CV wizard.

The screenshot shows the iqx software interface for a vacancy. The title bar reads "Temp Vacancy: SM Test 8 for A & M Stephens". The interface includes a menu bar with options like Reports, Search, Delete, and Help. A left-hand navigation pane lists various sections: Contact Events, Short List, Requirements, Rates, Diary, Shifts, AWR, Questionnaire, Website, Placements, Withholds, Timesheets, Site Details, Web Publish, Miscellaneous, Location Map, Shift Templates, Documents, Vacancy Roles, Vacancy Team, Compliance, Questionnaire, and Modify Screen.

The main area displays a form for the vacancy details, including fields for Company (A & M Stephens), Contact (May Proctor), Job Title (SM Test 8), No. of Posts (15), PO Number, Dates (From 10/04/2020), Pay / Charge (10.00 / 15.00), Status / Codes (Current), Dept./Desk/Con... (Drivers / Drivers / JANE), Client Department, Headline (Client H&S), and a section for "Vacancy Q'ai..." with fields for Maximum Sal..., Invoicing %, and Timesheet Dis. (Not selected).

Below the form is a toolbar with buttons: Search, Add, Remove, Send Docs, Send Details, Send CVs, Placement, Filter, Map, Not Finished, Show Previous State, Copy Short List, Select All, Expand, Process, Process Applicants, Applicant, Exclusive, and Show Hidden.

The bottom section contains a table of applicants:

Check the defaults in the Contact Details.

In the CVs to Send section, select the radio button for either sending by selected, state or the whole list - this refers to the candidates in the short list.

The Action Date and State will be updated automatically once the CVs have been sent, use the Change button if you want to change the new action date and/or state.

Click OK which will open a Contact Event form showing the Attached CVs tab.

If a Candidate does not have a CV in their record it will show as **Missing CV** against the Candidate. It is possible at this point to go to the Candidate record and arrange a CV, then return to the Contact Event, Update and continue.

From this stage you can now send the CVs by email either using a letter template or with an email message.

## To email CVs using a letter template:

Create a letter - go to the Letter Text tab and click Write Letter. Select the required template which will then open the template in word. Complete the letter with further text as required then go to file> email.

Ensure the CVs attached box is ticked and select whether you want the letter to go as an attachment or as the body text of the email.

You can attach further files if required: if the file is saved on your computer, click File and browse to find it.

( The file must not be open in the background.)

You can also attach any documents which are stored in the company or vacancy documents tab click Documents and select the relevant one. Send

## To email CVs with an email message:

Go to the Text tab within the Contact Event, write the email and click on [Send Email](#).

Edit the Subject line if required and confirm the CVs box is ticked.

You can attach further files if required: if the file is saved on your computer click [File](#) and browse to find it.

(The file must not be open in the background.).

You can also attach any documents that are stored in the Company or Vacancy documents tab, click [Documents](#) and select the relevant one. [Send](#)

## To email CVs without invoking Word or AXWWriter

If enabled by your Agency it is possible to send CVs from a vacancy shortlist without having it reformatted by opening in the Word Processor (MS Word or AXWWriter) as part of the process. If the general setting is set to Yes the 'Send without updating' option on the send email dialog will be ticked, meaning that CVs will be sent without any embedded merge fields being updated by the word processor. This can be useful if merge fields are not used and you wish to avoid any reformatting.
