User

The following new features require System Administrator Setup in order for them to work. These include:

- New role for adding and maintaining Users.
- Ability to restrict access to specific document types.

Contact Event - Email sent 'log'

A new view 'Email Log' has been added to Contact Events.

When an email is sent from a Contact Event a full list of recipients, a list of attachments (if any) and the date and time when the information was passed to the email system is now recorded in the new view Email Log.

If the email system has cleared down old emails it will show what attachments were sent and to whom.

New role for adding and maintaining Users

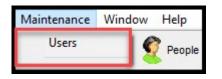

This feature requires System Administrator Setup

A new role has been added for Users which allows Users without full Maintenance rights to add and maintain Users and leavers.

The role is accessed via Maintenance - Users.

Users with User Maintenance rights will not be able to maintain their own User rights.

Users with Full Maintenance rights will still be able to maintain Users.

Ability to restrict access to specific document types

This feature requires System Administrator Setup

If set up by your system administrator a new column will appear in Person Documents, Person -Compliance Documents, Company - Documents, Vacancy - Documents, Progress - Documents, Placement - Documents. E.g.

Location Map	Expand Add File	Add MS-Office Document	Add Li	ink to File	<u>Delete</u>	Archive	Make Current (CV Copy to Co	mpliance
